

Dear Mr. Powell

As a listener of XM radio for over a year and a half, I have enjoyed the service, therefore XM radio is one of the best values I have seen in many years. I have two issues with the National Association of Broadcasters (NAB) action: 1. I live in Kalamazoo MI, and XM traffic and weather is for only limited markets (21) (New York, Los Angeles, Washington DC, ect.) 2. If the broadcast station feel the need to play music, yacking DJ's, and commercials, then traffic and weather is pushed to 15 seconds of time, and traffic is only if there is an accident or construction. I do not see how the NAB is going to loose anything, this is the market deciding what is the best service. If the local stations are unable or will not report the information that listners need, then they will look elsewhere.

Thank you

Barry Weyhmilller
